## Ecommerce video production built for modern brands

Shoppers can't touch or try your product before buying. Video shows how a product looks, works, and fits into their life, which builds trust and supports conversions. We turn your product assets into content for every stage of the customer journey, from discovery to purchase.

## What we create

AI product videos Video ads Demos & explainers Social videos UGC-style Image-to-video

### AI product videos

Turn product photography, footage, and descriptions into polished AI product videos. For beauty, fashion, and consumer brands, see our [AI product video ads](#).

### Ecommerce video ads

Scroll-stopping ads for paid campaigns, with multiple concepts and variations for testing across Meta, TikTok, and YouTube. Our [video ad agency](#) team builds these with performance in mind.

## Product demo & explainer videos

clear visual storytelling.

## Social media product videos

Short-form videos for Instagram Reels, YouTube Shorts, and TikTok product videos with platform-native hooks, pacing, and captions.

## UGC-style product videos

Authentic, creator-style content that builds social proof and trust.

## Product image-to-video content

Have product images but no footage? We use your existing assets as the foundation for dynamic video content.

## From product assets to finished video

You don't always need an expensive shoot. We can work with:

Product photography and existing footage

Product descriptions and packaging

Brand guidelines

Customer reviews and UGC assets

Existing advertisements

AI-generated visual concepts

## Our AI video production process

1. **Understand your product.** Target customer, positioning, competitors, and campaign goal.
2. **Develop the creative concept.** Visual direction, hook, messaging, and storyboard.

3. **Produce the visuals.** AI-assisted tools generate, enhance, or extend visuals while

4. **Edit and enhance.** Professional editing, motion graphics, sound design, and captions.

5. **Create variations.** Different hooks, formats, and CTAs for creative testing.

6. **Deliver platform-ready videos.** Formatted for your website, paid ads, and social channels.

## AI vs traditional ecommerce video production

TraditionalAI-assisted

The right approach depends on your product, campaign, and audience. AI-assisted production works best for scalable ecommerce content, while large commercial shoots still suit some hero campaigns.

## Why ecommerce brands use AI video production

- Produce more creative concepts
- Repurpose existing product assets
- Create multiple video variations
- Test hooks and messages faster
- Refresh ad creative more often
- Scale video across your catalog

We don't generate random visuals. We combine AI with creative strategy, professional editing, and brand consistency.

## Who we help

Product videos and ad creatives for direct-to-consumer campaigns.

## Ecommerce stores

Videos for product pages, social, and campaigns.

## Product brands

Launch videos, demos, and promotional content.

## Marketing teams

More variations without an in-house video team.

## Agencies

White-label ecommerce video production.

## Frequently asked questions

What is AI video production for ecommerce?

It uses AI-assisted tools and professional creative workflows to create product videos, ads, demos, and social content for ecommerce brands.

Can you create a product video from product images?

Yes. Product images can be the starting point for dynamic ecommerce videos, depending on the product and creative direction.

Can you create ecommerce video ads?

Yes. We create ads for promotions, launches, retargeting, and paid social.

Do I need to provide video footage?

Not necessarily. We can start from images, existing footage, product info, brand assets, or a creative brief.

Can you create multiple versions of one product video?

Yes. We develop different hooks, messages, formats, and CTAs for each platform and campaign objective.

## Turn your products into high-performing video

Have product images, footage, or just an idea? Let AdVido turn your product assets into professional ecommerce video content.
